Gayle R. Dierks, Principal

February 2006

To Whom It May Concern:

One of my roles as the Instructional Supervisor at the Chester M. Stephens Elementary School is to arrange with our School and Community Association (PTA) the cultural events and/or assemblies. I would have no hesitation recommending "Professor W's Earth Science Circus." This was an extremely entertaining learning experience for all the students at CMS.

This circus had it all – laughter, music, game show component, dance – and oh yeah, an important message for all our children: conservation and recycling. This was a non-stop highly enjoyable event for all our students, preschool to 5th grade. I would recommend this show to not only elementary schools, but I also believe that middle school students would appreciate the humor and message of Professor W's Earth Science Circus.

Please feel free to contact me with any questions.

Sincerely,

Stephanie A. Melick
Instructional Supervisor
