March 8, 2006

Dear Sir or Madam,

On Friday, February 24, 2006 The Grand Falloons traveled to Hillview Elementary School to perform a show entitled **Earth Science Circus**. This show was presented to a mixed audience of students ranging in age from kindergarteners through fifth graders. This particular act introduced the various components used in conserving our Earth's precious resources.

The Grand Falloons' quirky songs and slapstick humor kept the students engaged as they discovered various ways to make the world around them a better place to live in. By integrating juggling and magic tricks, children learned about how recycling and reusing everyday trash is vital for the environment. Stephen and Kim, the two performers, were not only entertaining, but they had an amazing knack for keeping the students calm and under control. The unique presentation was motivating and grade appropriate.

Based on the feedback from the staff and students, I would highly recommend this program to any elementary school. It was a wonderful learning experience for everyone involved. If you have any questions, please feel free to call me at your convenience.

Sincerely,

Kristin Shirk
Science Coordinator
